

MASTER of BUSINESS ADMINISTRATION

PROJECT MANAGEMENT

Program Overview

The Master of Business Administration in Project Management is ideal for individuals who want to enhance their ability to successfully manage complex projects. Grounded in general management principles, the MBA in Project Management program is a study of project management that provides students with the capability to master advanced project management techniques. The curriculum focuses on contemporary project management theories and practice. Students acquire knowledge of the project management tools, techniques, and processes necessary to effectively initiate, plan, execute, control, and close organizational projects and succeed as project management practitioners. The mission of the program is to provide students with competency in relevant project management knowledge, skills, and techniques necessary to succeed as practitioners in a global economy. MBA Project Management graduates are prepared to fill project management and leadership roles in modern organizations. The program is offered through a combination of on-campus and online courses or 100% online.
