

MASTER of SCIENCE

AGILE PROJECT MANAGEMENT

Program Overview

The Master of Science in Agile Project Management (MS/APM) degree is ideal for individuals who want to enhance their ability to manage complex traditional and agile projects. Courses focus on contemporary traditional and agile project management theories and practice. Students acquire knowledge of the project management tools, techniques, and processes necessary to effectively initiate, plan, execute, control, and close organizational projects and succeed as agile project management practitioners. MS/APM graduates are prepared to fulfill traditional project management, agile project management, and leadership roles in modern organizations. The mission of the Master of Science in Agile Project Management (MS/APM) program is to provide students with relevant technical and cognitive education to prepare for employment in Agile project management arenas. Additionally, the MS/APM program develops the skills required for successful Agile project outcomes by providing students with the opportunity to master Agile project management tools and techniques utilized by Agile practitioners in the industry. The program is offered through a combination of on-campus and online courses or 100% online.
