

Graduate Certificate **CYBERSECURITY MANAGEMENT**

Certificate Overview

The Graduate Cybersecurity Management Certificate program is designed to equip students and professionals with leadership positions to respond to cybersecurity issues in business and technical settings. It has a distinctive blend of basic business and managerial skills with a specific focus on addressing the intricacies of cybersecurity. The curriculum exposes students to emerging technologies like artificial intelligence, machine learning and blockchain, so that they can be prepared to address not only conventional security threats but also those that are brought by changing technologies.
